

P3 1 CLICK Hassle-Free Ordering™

Improves ordering efficiencies, deliveries, and invoicing

Smarter Stock Management

You can be confident in leaving all the details to us. We continuously review your stock levels against agreed parameters often resulting in a reduction of shelf space requirements and related capital needs.

Faster Process

Our one-stop-shop perpetual ordering system saves time and labor costs.

Better Control

Reduce the likelihood of theft by tracking items as they come in and out of inventory.

Our 3 Step Process

Discover

Your unique needs will be identified through our P3 Solutions Review™ where we carry out a pre-study to analyze your inventory management processes and then identify potential benefits to create a more efficient model.

Define

After completing the P3 Solutions Review™ your needs will be identified and presented via a P3 Solutions Analysis™ outlining implementation strategies, parameters, and information exchange agreements.

Deliver

We customize each P3 1 CLICK and thoroughly test the supporting systems prior to launching.

How does it work?

1. Client system integration via registering stock levels on the internet.
2. Stock levels are sent electronically to us through the P3 E-integration Storeroom System
3. The order is transferred to the distribution center where goods are prepared for delivery.
 - a. While goods are in transit, delivery status can be monitored by logging onto the P3 1 CLICK web interface.
 - b. Receipt of goods can be confirmed manually or electronically.
 - c. A convenient analysis of your purchases will be provided each month.

*Reduce Product Obsolescence
Save on Product Acquisition Costs
Clinical Support and Resources
Supply Utilization Training*

Follow-up

We are committed to 100% client satisfaction. Our relationship management style naturally lends itself to continuous follow-up. Every P3 1 CLICK system is monitored to ensure parameters are being met and that you are up to date with the latest technology.
